Source: FFY 2011 and FFY 2012 Form CMS-416 reports, Lines 1b (denominator) and 12b (numerator).

Note: These data include only preventive dental services performed by or under the supervision of a dentist. They do not include oral health services, such as fluoride varnish, performed by non-dental professionals, such as medical professionals, or any services performed by dental professionals not working under the supervision of a dentist. As a result, in most states these data are an undercount of the extent to which enrolled children are receiving preventive dental and oral health services.

State-Specific Comments:

<sup>1</sup> With the exception of FL and OH, the national FFY 2011 percentage used FFY 2011 data reported by states to CMS as of May 28, 2013. Due to errors in FL's FFY 2011 data that could not be corrected, the state's FFY 2012 data were used in the FFY 2011 national percentage. As FFY 2011 data for OH were reported after May 28, 2013, these data were not included in the FFY 2011 national percentage.

<sup>2</sup> With the exception of CT and OH, the national FFY 2012 percentage used data reported by states to CMS as of April 10, 2014. FFY 2011 data for CT were used in the FFY 2012 national percentage because final FFY 2012 data for CT are not currently available. As FFY 2011 data for OH were not used in the FFY 2011 national percentage, OH's FFY 2012 data were similarly excluded from the FFY 2012 national percentage.

<sup>3</sup> Final FFY 2012 data for CT are not currently available so the state's FFY 2011 data have been substituted in the FFY 2012 national percentage.

<sup>4</sup> For FL, the "--" in FFY 2011 signifies that there were errors in the FFY 2011 data that could not be corrected. As a result, FL's FY 2015 goal is based on the state's FFY 2012 data, and the state's FFY 2012 data were used in the FFY 2011 national percentage.

<sup>5</sup> As FFY 2011 data for OH were reported after May 28, 2013, these data were not included in the state baselines, and were thus not used in the FFY 2011 national percentage. As a result, OH's FFY 2012 data were similarly excluded from the FFY 2012 national average. OH's FFY 2015 goal was based on the state's FFY 2012 data.
