^a For some measures, the measurement period for the numerator, denominator, or continuous enrollment period varies depending on a specified date for each enrollee (such as enrollee birthdates, prescription or treatment start dates, and discharge dates). For these measures, two ranges are shown. The first date range identifies the full range of possible dates that states will need to use to calculate the measure for all measure-eligible enrollees. The text in parentheses describes the measurement period that should be used for each eligible enrollee.

^b When reporting each measure to CMS in MACPro, states should report the measurement period they used for the denominator in the “Start Date” and “End Date” fields. For many measures, this date range corresponds to calendar year 2015 (January 1, 2015 – December 31, 2015). Some measures also require states to review utilization or enrollment prior to this period to identify the measure eligible population. For these measures, two date ranges are included in this table. The first date range should be used to populate the Start Date and End Date fields in MACPro, while the second date range defines these prior review periods and should not be included in the Start Date and End Date fields in MACPro. For example, the AMM-AD measure instructs states to identify enrollees with antidepressant prescriptions that started May 1, 2014 through April 30, 2015 (the first date range). However, states will also need to review enrollee medication history for 105 days prior to the start of the index prescription (the second date range). States that followed the FFY 2015 Adult Core Set specifications should enter “May 1, 2014” in the Start Date field and “April 30, 2015” in the End Date field in MACPro. States should note any deviations to any measurement period (numerator, denominator, continuous enrollment) in the “Deviations from Measurement Specifications” section in MACPro.

^c No more than one gap in enrollment of up to 45 days during each year of the continuous enrollment period.

^d No more than one gap in enrollment of up to 45 days during the continuous enrollment period.

^e No more than one gap in enrollment of up to 45 days during each year of the continuous enrollment period. No gaps are allowed during the first three months of the continuous enrollment period (October 1, 2013 – December 31, 2013).

^f Blood pressure reading must occur after the diagnosis of hypertension was made.

^g No more than one-month gap in enrollment.

^h No more than one gap in enrollment of up to 45 days during the 365 days prior to the index discharge date and no gap during the 30 days following the index discharge date.
